## NOTES

### ABOUT THIS PUBLICATION

This is the last issue of *Monthly Summary of Statistics, Australia* (Catalogue no. 1304.0). However, most of the data usually contained in *Monthly Summary of Statistics, Australia* is now available in *Australian Economic Indicators* (Catalogue no. 1350.0). To subscribe to the *Australian Economic Indicators* publication please contact ABS Subscription Services on (telephone) 1800 02 0608.

The *Monthly Summary of Statistics, Australia* contains, at the time of printing, the latest available data on a wide range of topics. It provides a comprehensive overview of the economic and social conditions in Australia.

In the contents pages, tables of series containing seasonally adjusted indicators are marked with a dagger (†).

As well as being adjusted for normal seasonal factors, some of the statistical series included in the *Monthly Summary of Statistics, Australia* have been adjusted for the effects of calendar variation: namely, trading-day effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in a month) and the influence of movable holidays, for example, Easter and Australia Day.

Trend estimates are shown for some series in which the seasonally adjusted series have been smoothed to reduce the impact of the irregular component.

### SYMBOLS AND OTHER USAGES

The following is an explanation of the symbols used in this publication:

AHECC	Australian Harmonized Export Commodity Classification
ANZSIC	Australian and New Zealand Standard Industrial Classification
ASIC	Australian Standard Industrial Classification
kWh	kilowatt hour
MJ	megajoule
n.a.	not available
n.e.c.	not elsewhere classified
n.e.s.	not elsewhere stated
n.p.	not available for publication unless otherwise indicated but included in totals where applicable
n.y.a.	not yet available
p	preliminary figure or series may be subject to revision
r	figures or series revised since previous issue
*	subject to sampling variability too high for most practical purposes.
. .	not applicable
—	nil or rounded to zero
—	break in continuity of series (where drawn across a column between two consecutive figures)

Yearly periods shown as, for example, 1995, refer to the year ended 31 December 1995, those shown as, for example, 1994-95, refer to the year ended 30 June 1995.

Values are shown in Australian dollars (\$).

Where figures have been rounded, discrepancies may occur between sums of the component items and totals. Also, minor revisions to figures already published are not applied for periods more than one quarter prior to the quarter of publication. Hence, small discrepancies may occur between annual data and totals derived by summing the data for each of the four quarters.

Most of the original and all of the seasonally adjusted series are subject to revision.

#### FOR MORE INFORMATION

The ABS has a far wider range of information on Australia than that contained in this publication. Information is available in the form of regular publications, electronic data services, special tables and from investigations of published and unpublished data.

Current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (1101.0). The ABS also issues, on Tuesdays and Fridays, a *Release Advice* (1105.0) which lists products to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

#### RELEASE SCHEDULE

Please note that there has been a break in the series of this publication. Delays in the production of the *Monthly Summary of Statistics, Australia* means that issues for March, April and May 1996 have not been released.

The following timetable shows the details for 1996 releases of this publication:

<i>Issue</i>	<i>Release Schedule</i>
July	released 16 August 1996
August	released 30 August 1996
September	released 30 September 1996
October	released 31 October 1996

<sup>1</sup> The estimates relate to all persons aged 15 and over except members of the permanent defence forces, certain diplomatic personnel of overseas governments, overseas residents in Australia and members of non-Australian defence forces in Australia. For definitions see Explanatory Notes in the latest issue of the monthly publication *Labour Force, Australia* (6203.0).

<sup>2</sup> Original labour force estimates are now based on population estimates obtained from the 1991 Census of Population and Housing.

<sup>3</sup> The number of unemployed in each group as a percentage of the labour force in the same group.

<sup>4</sup> The labour force in each group as a percentage of the civilian population aged 15 and over in the same group.

<sup>1</sup> See Explanatory Notes in the latest issue of *Consumer Price Index* (6401.0).<sup>2</sup> The statistics for Germany refer to Western Germany — Federal Republic of Germany before the unification of Germany. Revised in January 1991 due to new weighting pattern and methodological changes.<sup>3</sup> From March quarter 1994 the statistics for New Zealand refer to 'all groups excluding housing and credit services'.

<sup>1</sup> These indexes replace previous indexes with a base year 1968-69 = 100.0. Refer to May 1990 issue of *Price Indexes of Articles Produced by Manufacturing Industry* (6412.0).

<sup>2</sup> These indexes are on a net subdivision basis. ASIC subdivision codes are shown in brackets at the head of the columns.

<sup>3</sup> This index is on a net division basis and relates in concept only to articles which are produced in the Manufacturing Division of ASIC (Division C) for sale or transfer outside the Division.

<sup>2</sup> Total electricity generated by establishments predominantly engaged in the generation of electricity.

<sup>3</sup> This series replaces the previously published 'Iron and Steel in Primary Forms' and 'Blooms and Slabs from rolling and forging'. Changes in industry practices mean that almost all raw steel is now used to produce Blooms and Slabs using continuous casting methods.

<sup>1</sup> Comprises holdings of Foreign Exchange, Special Drawing Rights, Reserve position in IMF and Gold. Figures are end period \$A values, except for the 'US\$ equivalent' series, and, those referring to 'movement due to' and 'RBA transactions'. June figures for the latter in the top half of the table refer to totals for financial years.

<sup>2</sup> Reported according to the date on which they were undertaken ('trade date').

<sup>3</sup> Reserve Assets and Exchange Rates in the Balance of Gold is valued at the \$A equivalent of the 3 p.m. price fix in the London gold market on the last business day of the month. See also Official Payments section, table 62.

<sup>1</sup> In using this seasonally adjusted series extra care should be exercised because of the difficulties associated with reliably estimating its seasonal pattern.

NOTE: These statistics are designed primarily to measure trends in investments in stocks by private enterprises. The statistics in this table differ somewhat from the item increase in stocks in table 45 as a result of the different methods of compilation of these two sets of statistics.

<sup>1</sup> The Statutory Reserve Deposit ratio for trading banks was set at zero on 27 September 1988 and balances transferred to non-callable accounts. On 12 October 1988, stand-alone savings banks made their first deposits under arrangements for all banks to hold non-callable deposits with the Reserve Bank.

<sup>2</sup> Break in series due to establishment of new banks, which may have caused the switching of assets and liabilities from NBFIs to banks.

<sup>1</sup> Includes government-owned vehicles except those belonging to the defence services. Excludes plant and equipment, caravans and trailers. Data in this table is based on the System of Vehicle Identification Numbers. The system allows more accurate identification and classification of newly registered vehicles and as a result there is a reduction in the level of new vehicle registrations through better identification of duplicate registrations and those registered previously.
